

ALUCAT® Catamarans SUPERIORITY

SAFETY

ALUCAT-catamaran, durable and safe partner. Certified.
A lot of area on deck for demanding work. Compartmented hull.

STABILITY

Super stable, withstands a heavy load on board.
A good bow capacity. Excellent working facilities on board.

DECK AREA

Large, self-draining, flat and stepless open deck area. Bowramp for rescue. Illuminated boxes and deck.

MULTIPURPOSE USE

Deck equipment by customer's need. Removable seatboxes.
Mounting rails. Fast to load on a trailer. Easy to maintain.

ECONOMIC

Environment praises. Fuel consumption almost even with load. Hull with workboat standards. Eco-friendly material.

DRIVING CHARACTERISTICS

Turns firmly without drifting and stays horizontal. Small turning radius. Quiet cabin. Excellent planing character.

STOP AND GO

Stern does not fall down. Moves smoothly through waves.
Small planing threshold. Light sternwave. Easy diving.

ASHORE

Goes easily ashore. Steplessly adjusted hydraulic bowramp. Shallow draught. Landing reinforcements.

ALUCAT® W10

RESCUE

ALUCAT® W10 RESCUE

State of art handling, stable, safe and spacious multi-purpose boat with a catamaran hull for a demanding professional use.

ALUCAT® is **SAFE**

Stability, Area, Flexibility and Economy

"That you'd return home"

ALUCAT®

better boats

Stability

Because of the catamaran design, ALUCAT® is very stable and withstands a large load on board. It stays firmly horizontal even on tight turns. Moving around the flat deck area is easy and safe. The boat has a first-class manoeuvrability and it can be driven straight ashore due to shallow draught. The diving and rescue action are possible with a wide bow ramp.

Area

Usable area on the flat deck ~10m². The boat is easily loaded via a hydraulically operated bow ramp. The flat deck enables vital rescue operations and the storage of necessary equipment. The lockable seating boxes for equipment are set up by customer's need. The boats are equipped with the mounting rails and accessories desired by the customer. The self-draining deck is easy to keep clean.

Flexibility

The deck area is well-adapted to suit for the different needs. W10 RESCUE is built for demanding and fast action like rescue, transport and oil recovery. All the equipment over the wide deck area are tailored with the customer's need. Fire pump and replaceable ashore reinforcements are available. Fast to load on an ALUCAT-trailer.

Economy

The catamaranboat has excellent planing characteristic. This means cost-effective engine investment and thus, a lower fuel consumption. The fuel consumption increases only slightly with a heavy load on board. ALUCAT®-boats are made from durable and recyclable materials.

Technical information

Boat type	Catamaran
Material	Aluminum 5083
Deck commercial squares	~ 10 m ²
Length	5,95 m
Width	2,35 m
Bow ramp width	0,9 m (hydraulic 0,75 m)
Weight	~ 700 kg
Carrying capacity	~ 940 kg
Draught	~ 0,35 m
Tank	147 L
Number of persons	max 8
Recommended power	1 x 100-180 hp 2 x 60-90 hp
CE- category	CE / C (coastal waters and lakes) (Work boat / oil recovery approval) (DIN 14961, EN 1914)
